

# Delicate

Damien Rice // Capo 2

*Intro:* **F – C – F – C – G**

*Verse 1:*

**F**                    **C** **F**                    **C**  
We might kiss – like we are alone  
**F**                                    **C**                                    **G**  
When nobody's watching, we might take it home  
**F**                    **C**                    **F**                                    **C**  
We might make out – when nobody's there  
**F**                                    **C**                                    **G**  
It's not that we're scared, it's just that it's delicate

*Chorus:*

**F**                                    **C**  
So why do you fill my sorrow, with the words you've borrowed  
                                  **F**                                    **C**  
From the only place you've known  
                                  **F**                                    **C**  
And why do you sing hallelujah, if it means nothing to ya?  
                                  **F**                                    **G**  
Why do you sing with me at all?

*Verse 2:*

**F**                    **C** **F**                    **C**  
We might live – like never before  
**F**                                    **C**                                    **G**  
When there's nothing to give, well how can we ask for more?  
**F**                    **C**                    **F**                                    **C**  
We might make love, in some sacred place  
**F**                                    **C**                                    **G**  
The look on your face, is delicate
